# BUICK REPAIRING

**WE CALL FOR AND DELIVER YOUR CAR**

**DIAL 43-292**

**After 5:30—410-196**

**ALL WORK GUARANTEED**

**310 W. Phila.**

Always listen before you start to dial to be sure that the line is not in use. If a conversation is heard, hang up the receiver and wait until you believe the conversation is completed before making another attempt.

To dial any figure, place your finger firmly in the hole in the dial through which the figure is seen. Pull the dial around until your finger strikes the finger stop. THEN REMOVE YOUR FINGER from the hole and let the dial return until it stops in the normal position. Do not touch the dial while it is returning, because any attempt to hasten or retard its motion will interfere with the operation of the equipment and probably result in a wrong number. Each letter or figure must be dialed in its consecutive order to obtain the desired numbers.

Always allow the dial to come to a full stop before dialing the next figure. Too rapid dialing does not permit the apparatus associated with the dial to function completely.

Do not move the dial before removing the receiver or in the act of removing the receiver, as a part of the dialing may be completed before the receiver hook is fully released. A wrong number would result.

Do not move the dial while talking, as it may break the connection.

Do not move the receiver hook up and down after you have established a connection or before you have finished talking, for to do so will break the connection.

IF THE PARTY TO WHOM YOU ARE TALKING IS DISCONNECTED, hang up your receiver for a few seconds and, if you are the calling party, dial the entire number again. If however, you were called by the person to whom you have been talking and disconnection occurs, hang up the receiver and wait to be called.

If party desired is on your line follow instructions on PARTY SUBSCRIBERS RING BACK NUMBER CARD.

**IMPORTANT:**—If, before you complete dialing, you find that you have made an error, or if your finger slips out of the hole while dialing, hang up the receiver for a few seconds. Then take the receiver off and dial the entire number again.

**THE RINGING SIGNAL OR TONE** is an intermittent burring sound which you hear at regular intervals and indicates that the called party's telephone is ringing for your call. If you are not answered within a reasonable time, ordinarily 5 to 10 rings, it is a safe conclusion that no one is there to answer the telephone and the receiver should be hung up.

**THE BUSY SIGNAL** is an interrupted "Buzz Buzz" sound on the line and indicates the called party's line is busy.

If after several attempts have been made to dial a number and you have not heard the "Ringing" signal, or if you keep getting a busy signal, dial 492, Repair Service, and report to them.

**HANG UP THE RECEIVER AFTER YOU HAVE FINISHED TALKING** to disconnect your telephone from the telephone you have called.

**KEEP THE RECEIVER ON THE HOOK FOR A FEW SECONDS BEFORE MAKING ANOTHER CALL.** If you wish to make a second call after completing the first, it is necessary to hang up the receiver for a few seconds before starting to dial to give the equipment time to break the first connection. Likewise, after receiving an incoming call an attempt to dial a number should not be made for a few seconds after you have hung up the receiver.

**WRONG NUMBERS.** When you know that a false call is due entirely to your error, why not acknowledge it to the party who answers the call? Why leave the Telephone Company to shoulder the blame?

Advertise you have a telephone, BUT DON'T PUT ITS NUMBER ON YOUR LETTER HEADS, CARDS OR AUTOS. Why? Because this only increases the amount of trying to remember such numbers by the public, also the continued use of obsolete numbers—which in turn only hurts the service and doesn't help your business at all. Think this over.

The use of profane or obscene language over the lines is positively forbidden. The use of the local lines is limited to five minutes. The Company reserves the right to disconnect or remove a telephone without notice for either of the above causes.

## TOLL SERVICE

(Rates quoted by toll operator are usually station-to-station rate.)

I. **NUMBER SERVICE** is a type of service for reaching out of town stations at nearby points. The rates are for an initial period of 5 minutes.

II. **STATION-TO-STATION SERVICE** is a type of service on which the calling party does not specify a particular person to be reached, but gives only the number of the telephone station desired or the name and address under which the telephone is listed.

III. **PERSON-TO-PERSON SERVICE** is a type of service on which the calling party specifies a particular person (or a Private Branch Exchange Station) at the called number.

Person-to-person service is not rendered to certain nearby points.

For any of the above service dial 497.

## RATES TO SOME OUT-OF-TOWN POINTS

(Rates Between Points Not Listed Below May Be Obtained by Calling "Long Distance")

WHITTIER TO	STATION TO STATION CALLS			Person to Person All Hours

The above rates are for an initial period of 3 minutes, except those preceded by an asterisk (\*) which are for an initial period of 5 minutes.

Rates for Appointment or Messenger calls may be obtained by calling Long Distance.

Station-to-Station rates of 25c or less are for an initial period of 5 minutes.

Station-to-Station rates in excess of 25c are for an initial period of 3 minutes.

All Person-to-Person rates are for an initial period of 3 minutes.

A REPORT CHARGE is applicable on Person-to-Person calls under certain conditions.

When charges are reversed on Station-to-Station calls, the Person-to-Person rates become effective.

## To secure the time of day, dial 494.

The dialing of this number operates a set of chimes connected to a master clock. The number of strokes on the low pitch chime indicates the hour, the medium chime the ten-minute intervals and the high pitch chime the unit of minutes. For example: 9:32 you will hear nine low pitch chimes, three medium and two high pitch chimes. 9:03 will be indicated by nine low pitched tones, a buzz and three high pitched tones, the buzz indicating the zero.
